

RE-THINK BOTTLED WATER

THE INCREASING POPULARITY OF BOTTLED DRINKING WATER HAS SIGNIFICANT SOCIAL AND ENVIRONMENTAL IMPACTS, INCLUDING:

- The energy used to produce the plastic containers and deliver the filled bottles to consumers.
- The concentrated water withdrawals near bottling facilities
- The plastic waste from discarded bottles.

.....
By choosing tap water over bottled water, you can not only save money,
but also reduce negative environmental impacts.

.....
**THESE SIMPLE OPTIONS OFFER
ALTERNATIVES TO BOTTLED WATER:**

-
- Buy a pitcher water filter system for work or home.
 - Install an inexpensive faucet filter to remove trace chemicals or bacteria.
 - Always carry a reusable water bottle with you.
